ABOUT ME

A personal profile based on what I have shared in our conversations

Introduction

I am a Data Science and Engineering student at the Royal University of Phnom Penh (RUPP). I am interested in technology, programming, artificial intelligence, and using data to solve real-world problems. I enjoy learning new skills through practical projects and improving step by step.

Education and Technical Skills

My studies involve programming, data analysis, software development, and machine learning. Some of the technologies and topics I have explored include:

- Python and data analysis
- React and JavaScript for frontend development
- PHP and backend development
- MongoDB and database concepts
- Machine Learning and customer churn prediction
- Retrieval-Augmented Generation (RAG) and Agentic AI

Projects and Learning

One of my main projects is a Library Management System. I have been working on its user interface and frontend, and learning how to connect it to a backend and database. I have also worked on machine-learning assignments and explored how AI systems can retrieve information from documents. I prefer explanations that are clear and beginner-friendly, with examples and comments that help me understand what each part of the code does.

Goals and Interests

- Improve my English and prepare for the IELTS exam.
- Strengthen my programming, data science, and AI skills.
- Explore international study opportunities, especially in Japan.
- Build useful projects and gain practical experience.
- Explore ways to earn income online while continuing my studies.

Personal Approach

I learn best by doing. I like direct guidance, simple language, practical examples, and step-by-step support when I face a difficult problem. I can sometimes feel frustrated when something does not work, but I keep asking questions and trying to understand how to fix it. I also value personal growth, good communication, and maintaining meaningful relationships.

A Note About This Profile

This profile is a short summary based only on information I have shared in conversations. It may not include every part of my life, and I can update it as my interests, studies, and goals change.

Curious • Practical • Always Learning
